

14	B	Using $v_0 = \omega x_0$, $3 = \frac{2\pi}{12} x_0$ giving $x_0 = 5.730$ cm Using $a_0 = \omega^2 x_0$, $a_0 = \left(\frac{2\pi}{12}\right)^2 \times 5.730 = 1.571$ cm s⁻¹ Hence maximum restoring force = $3.0 \times 1.571 \times 10^{-2} = 4.7 \times 10^{-2}$ N Option C: wrong $T = 15/1.5 = 10$ s Option D: forgot to square omega, and mass multiply by max v = 3.0×0.03
15	C	Since the wave pulse is travelling to the right, the last point on the displacement time graph will be
