

11	C	total energy at top of ramp = total energy at lowest point $mgh = \frac{1}{2}mv^2 \rightarrow v^2 = 2gh$ By Newton's second law of motion, at the lowest point,

Qn	Ans	Solution
		$R - mg = \frac{mv^2}{r}$ $R = \frac{m(2gh)}{r} + mg$ Since $r = h$, $R = 3mg$
12	A	Gravitational potential at infinity is zero
