

			$R = 8 \text{ J mol}^{-1} \text{ K}^{-1}$
	12	A	Gravitational potential at infinity is zero. Moving from -30 MJ kg^{-1} to -70 MJ kg^{-1} means moving closer to Earth. Potential energy change = $50 [-70 - (-30)] = -2000 \text{ MJ}$
	13	D	A is true: From $pV = nRT$ at constant pressure, when volume is doubled
