

Answer: D

11 $pV = nRT$

$$\frac{p}{T} = \text{constant}$$

Pressure is zero at $T = 0$ K.

p - T graph is a straight line graph through the origin if the temperature is in kelvin.

p - T graph is a straight line graph intercepting the T -axis at -273.15°C if the temperature is in degrees Celsius.

Answer: A

12 Determining the phase angle at $d = 5.0$ cm
