

$$25 \quad P_s = 0.9P_p$$

$$P_s = 0.9(2300)(10)$$

$$\frac{V_s}{V_p} = \frac{N_s}{N_p} = \frac{1}{40} \Rightarrow V_s = \left(\frac{1}{40}\right)2300$$

$$I_s = \frac{P_s}{V_s} = \frac{0.9(2300)(10)}{\left(\frac{1}{40}\right)2300} = 360 \text{ A}$$

Answer: C

$$26 \quad KE = \frac{1}{2}mv^2 = p^2$$
