

- 26** An electron of mass m and charge e is accelerated from rest through a potential difference of V .

What is the frequency of a photon whose wavelength is equal to the de Broglie wavelength of this electron?

A $\frac{c\sqrt{2meV}}{h}$

B $\frac{h}{c\sqrt{2meV}}$

C $\frac{hc}{eV}$

D $\frac{eV}{h}$

27 When a parallel beam of white light passes through a cool vapour, dark lines appear in the
