19 The diagram shows a positive charge Q with dotted lines showing equipotential surfaces.

A small positive charge is moved from point P closer to the charge Q along three different paths X, Y and Z. The work done along each path is W_X, W_Y and W_Z.

Which relationship is correct?

A $W_Z > W_Y > W_X$

B $W_X > W_Y = W_Z$

C $W_X = W_Y = W_Z$

D $W_Z = W_Y > W_X$
