5 A ball is projected off a cliff horizontally with velocity v. It lands on the ground a time t later at a distance d from the foot of the cliff as shown. Air resistance is negligible.

If a heavier ball is projected off the same cliff with the same velocity, which row is correct for the heavier ball?

	time to land	distance from foot of cliff
A	t	d
B	t	less than d
C	less than t	d
D	less than t	less than d
