14 A wave pulse of length 0.25 m is shown at time $t = 0$. It moves along a string, fixed at point O, at 0.50 m s^{-1}. P is a point along the string 0.25 m from point O and 0.25 m from the pulse at $t = 0$.

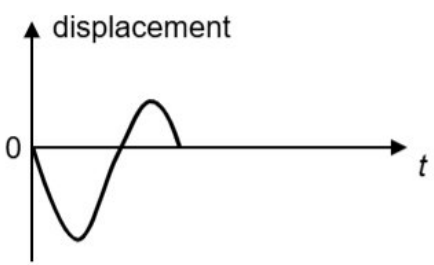

Which graph best represents the displacement of point P with time for the period $t = 1.5$ s to $t = 2.0$ s?

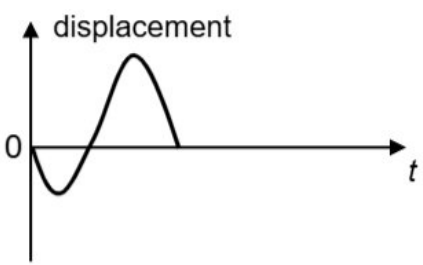

A

B

C

D
