11 The diagram below shows three polarisers W, X and Y.

A beam of unpolarised light of intensity I_0 is incident normally onto the surface of polariser W, which then passes through polariser X and eventually emerges from polariser Y.

The axis of polarisation of each polariser is indicated by a dashed line.

What is the intensity of the light that emerges from polariser Y?

A $0.11 I_0$ **B** $0.32 I_0$ **C** $0.43 I_0$ **D** $0.64 I_0$
