

1	(a)				B1
	(b)			No horizontal force acting on it. Hence, no horizontal acceleration.	M1 A0
	(c)	(i)		$v^2 = u^2 + 2as$ $32^2 = 0 + 2(9.81)s$ $s = 52.2 \text{ m} = 52 \text{ m}$	C1 A0
		(ii)		Time taken to travel 52 m, $s = ut + \frac{1}{2}at^2$ (OR $v = u + at$, $v=32$) $52 = 0 + \frac{1}{2}(9.81)t^2$ $t = 3.26 \text{ s}$ $QR = 3.26(95) = 310 \text{ m}$	C1 A1
	(d)			<u>Horizontal speed is reduced more significantly due to the much higher velocity.</u> <u>Vertical resultant force is reduced.</u> Vertical acceleration is less. Time is longer $\Rightarrow$ right of Q	M1 A1
