

19 The electric potentials V are measured at distances x from P along a line PQ.

The results are:

V / V	18.0	15.0	14.5	14.0	13.0
x / m	0.020	0.030	0.040	0.050	0.060

The component along PQ of the electric field for $x = 0.040 \text{ m}$ is approximately

- A** 50 V m^{-1} towards P.
- B** 50 V m^{-1} towards Q.
- C** 360 V m^{-1} towards Q.
- D** 360 V m^{-1} towards P.

20 Charge carriers, each of charge q , move along a wire of fixed length. The number density
