

- 16** A mass  $m$  on a smooth horizontal table is attached by two light springs to two fixed supports as shown below. The mass executes simple harmonic motion of amplitude  $a$  and period  $T$ .

The total energy of oscillation is

- A**  $2\pi m a^2 / T^2$
- B**  $2\pi m^2 a^2 / T$
- C**  $\pi^2 m a^2 / T^2$
- D**  $2\pi^2 m a^2 / T^2$
