

3 A man is parachuting towards the Earth. According to Newton's third law of motion, the force which makes an action-reaction pair with the gravitational force on the man is

- A** the gravitational force on the Earth due to the man.
- B** the viscous force of the man and his parachute on the air.
- C** the viscous force of the air on the man and his parachute.
- D** the tension in the harness of the parachute.
