

- 5** A boy throws a ball vertically upwards and the ball subsequently returns to its original position. Air resistance is **not** negligible. Which of the following is true?
- A** Initial speed of ball is the same as final speed.
 - B** Acceleration is maximum when the ball is at its maximum height.
 - C** Acceleration of the ball when it first leaves the hand is 9.81 m s^{-2} .
 - D** Magnitude of the acceleration of the ball as it travels upwards is larger than that when it travels downwards.
