

		$= \pm 2 \text{ (1sf)}$ $s \pm \Delta s = (20 \pm 2) \text{ m}$
3	C	Area under a-t graph gives change in velocity. Area under graph = $1/2(8.0)(0.2) = 0.8 \text{ m s}^{-1}$ Final velocity = $-1.0 + 0.8 = -0.2 \text{ m s}^{-1}$
