

both resistors are in parallel so variation p.d. across R_2 is always same, which is that of source.

28 photoelectric effect:

$$hf_1 = \Phi + E_1$$

$$hf_2 = \Phi + E_2$$

$$h(f_1 - f_2) = E_1 - E_2$$

$$h = \frac{E_1 - E_2}{f_1 - f_2}$$
