

Hence $I_0 = I_{rms} \sqrt{2} = 0.25 \sqrt{2} = 0.35 \text{ A}$

29.

Ans: B

Using $E_3 - E_1 = hc/\lambda$

$$\lambda = hc / (E_3 - E_1) = hc / (1303 - 49.7)(1.6 \times 10^{-19}) = 0.992 \text{ nm}$$

30.

Ans: A
