

ratio of pe = $\frac{1}{2} \vdash X_1 / \frac{1}{2} \vdash X_2 = X_1 / X_2 = 1:2$

9 A During 2.0 s, displacement $s =$ area under v-t graph $= \frac{1}{2} \times 2.0 \times 0.5 = 0.5 \text{ m}$

Work done by force $= Fs = 3.0 \times 0.5 = 1.5 \text{ J}$

10 C The resultant of 160 N and 120 N should provide the horizontal centripetal force.
