

	$x = 0.18 \text{ mm}$
16.	Ans: B In a close loop, change in internal energy = 0 J. Net work done by the gas = area enclosed by the graph = 200 J. i.e. Net work done on gas = -200 J. $\Delta U = \Delta Q + \Delta W$ $0 = \Delta Q + (-200)$, $\Delta Q = 200 \text{ J}$ i.e. Net heat absorbed by gas = 200 J.
17.	Ans: C
