

from the right side of the ring.

27. Ans: C

To find I_{rms} , first square the graph, find total area over 1 period, find the average area over 1 period, then square root.

$$I_{rms} = \sqrt{\frac{4.0^2 \times 1 + 2.0^2 \times 2}{4}}$$

$$= 2.45 \text{ A}$$

$$P_{ave} = I_{rms}^2 R$$

$$= 2.45^2 \times 11$$

$$= 66 \text{ W}$$
