

		$V_{\text{final}} = 0.25 \text{ v}$
6	C	Tension in the cord = mg Torque on disc = $mg \times 0.25 = 0.25 \text{ } mg$ Torque due to $F = F \times 1.40 = (0.25)(9.81) \text{ } m$ $F/ m = (0.25)(9.81)/1.40 = 1.75$
7	A	GPE increases linearly with displacement. EPE starts later, increases with extension squared (parabolic upwards)
