

17.	D	Wavelength of wave $\lambda = v/f = 200 / 100 = 2.0 \text{ m}$ Phase difference $\frac{x}{\lambda} = \frac{\phi}{2\pi} \quad x = \frac{\phi}{2\pi} \lambda = \frac{\frac{5\pi}{4}}{2\pi} \times 2 = \frac{5}{4} = 1.25 \text{ m}$
18.	C	Period $T = 1/f = 1/100 = 0.01 \text{ s}$ wavelength $\lambda = v/f = 200/100 = 2 \text{ m}$
