

		Hence emf does not depend on resistance of coil.
27.	D	Given: peak voltage V and peak current across a resistor R Mean power of a sinusoidal cycle $\langle p \rangle = \frac{1}{2}$ peak power $\langle p \rangle = \frac{1}{2} \times (V_{\text{peak}}^2 / R)$
28.	C	Work done of electrons = energy of x-ray photons emitted. (For max photon
