

		$15 \times 1 = \frac{1}{2} \times 2 \times t^2 \rightarrow t = 15.0 \text{ s}$ Hence additional time $= 15 - 6 = 9 \text{ s}$.
	4.	D The force on the racket must be equal and opposite to the force on the ball based on Newton's 3rd Law.
	5.	A Acceleration along slope: $a = g \sin 10^\circ = 1.7$
