

5	(a)(i)	 Direction At least 3 concentric circles with increasing spacing	B1 B1
	(ii)	 uniform field near magnet poles stronger field on top, weaker field below	B1 B1
	(b)	By Fleming's left hand rule, there is a downward force on wire by magnet. By Newton's third law, there is <u>an upward force on magnet</u> by wire. Since there is a <u>upward force on magnet</u> due to wire carrying current, <u>there will be a decreased in balance reading.</u>	B1 B1 B1

6	(a)	234D_{p} 234U_{p} 4U_{p}	A1
