

Ans: B

18 The electric potentials V are measured at distance x from P along a line PQ.

The results are:

V / V	13	15	18	21	23
x / m	0.020	0.030	0.040	0.050	0.060

The electric field at $x = 0.040 \text{ m}$ is approximately

- A** 300 V m^{-1} towards Q
- B** 300 V m^{-1} towards P
- C** 450 V m^{-1} towards Q
- D** 450 V m^{-1} towards P

Ans: B

19 A piece of wire of original length l has a resistance of R . It is then melted and made into a new
