

The angle does not play a part.

23 An electron is moving along the axis of a solenoid carrying a current.

Which of the following is a correct statement about the electromagnetic force acting on the electron?

- A** No force acts on the electron.
- B** The force acts in the direction of motion.
- C** The force acts opposite to the direction of motion.
- D** The force causes the electron to move along a helical path.

Ans: (A)

Magnetic field is along the axis. Since velocity of electron is parallel to magnetic field, no electromagnetic force acts on the electron.

24 The North pole of a bar magnet is pushed into the end of a coil of wire. The magnetic force on the
