

- 1 Which of the following statements is not always true?
- A The total mass of two 1 kg masses is 2 kg.
 - B The total charge of a +1 C charge and a -1 C charge is zero.
 - C** The resultant of two 1 N forces is 2 N.
 - D The total energy of 1 J of kinetic energy and 1 J of potential energy is 2 J.

Vector addition takes into consideration direction.

- 2 The following are the results obtained by two students P and Q in the determination of the mass
