

	$\lambda_0 = v / \omega = 0.0 / 0.333 = 10.0 \text{ m}$
14	Answer: A An oscillating system will have the same frequency as that of the periodic force applied to it. Thus the system will have a frequency of 2.0 Hz after being subjected to the force (Period = $1/2.0 = 0.50 \text{ s}$) The time taken for it to go from one maximum displacement to the next is half a period ($0.50 / 2 = 0.25 \text{ s}$)
15	Answer: B
