

	decrease density, decrease speed of waves in water, same as C.
16	Answer : C $\frac{1}{2}$ wavelength (peak to peak) = 33.4 cm = 0.334 m speed = 334 m s⁻¹ Hence frequency = 334 / (2 x 0.334) = 500 Hz So period = 1/500 = 2.00 ms 1 cm ~ 0.5 ms 1 wave / period ~ 4 cm
17	Answer: A
