

	1 wave / period = 4 cm
17	Answer: A

	Let $V_R = 0 \text{ V}$. $V_Q = 6 \text{ V}$ $V_P - V_Q = 3 \text{ V} \Rightarrow V_P = 9 \text{ V}$ $V_P - V_S = 5 \text{ V} \Rightarrow V_S = 4 \text{ V}$ Hence, $V_{QS} = 6 - 4 = 2 \text{ V}$ and $V_{SR} = 4 - 0 = 4 \text{ V}$
18	Answer: C
