

27

Answer: A

$$\text{Using } KE = \frac{1}{2}mv^2 = \frac{p^2}{2m}, \frac{h^2}{2m\lambda^2} \rightarrow mv \propto \frac{1}{\lambda}.$$

$$\frac{\lambda_p}{\lambda_e} = \frac{m_e v_e}{m_p v_p} = 2.5 \times 10^{-4}$$

28

Answer: B
