

- 9 Air in a bicycle pump is forced through a valve at a constant pressure P_{pump} , to supply air to a tyre which is initially at a pressure P_{tyre} . In one stroke of the pump, the volume of air in the pump chamber is reduced from V_1 to V_2 .

What is the work done on this air in one stroke of pump ?

- A $P_{\text{pump}} V_1$
- B $P_{\text{pump}} (V_2 - V_1)$
- C $P_{\text{tyre}} V_1$
- D $P_{\text{tyre}} (V_2 - V_1)$

Ans : B

- 10 Which one of the following statements is true about gravitational potential energy, electric
