

28	A	For sinusoidal input, Mean Power, $W = \frac{V_{rms}^2}{R} = \frac{\left(\frac{V_0}{\sqrt{2}}\right)^2}{R} = \frac{V_0^2}{2R}$ Mean power for square wave, $P_B = \frac{V_{rms}^2}{R} = \frac{\left(\frac{V_0}{\sqrt{2}}\right)^2}{R} = \frac{V_0^2}{2R} = W$
29	D	For the spectral line with shortest wavelength the energy
