

		$\Rightarrow u_1 = 2 u$
7	D	By C.O.M.E., Gain in KE = Loss in GPE Thus, $\frac{1}{2} m v^2 = mgr$

		$mv^2/r = 2.0\ mg \text{ --- (1)}$ For circular motion, $\Sigma F = mv^2/r$ Thus, $N - mg = 2.0\ mg$ $N = 3.0\ mg$
8	6	For circular motion, $\Sigma F = mv^2/r$
