

So, option C will be the best option.

11

C

A

$$g_N = g_E \text{ and } g = \frac{GM}{R^2}$$

$$\frac{GM_N}{R_N^2} = \frac{GM_E}{R_E^2}$$

$$\frac{R_N}{R_E} = \sqrt{\frac{M_N}{M_E}} = \sqrt{17} = 4.1$$

12

B

A
