

	For division, the s.f. of calculated data is recorded to the lowest s.f. of the raw data	
3	B Using $s = ut + \frac{1}{2} t^2$ $9 = u(2) + \frac{1}{2} a(2)^2$ --- (1) $21 = u(4) + \frac{1}{2} a(4)^2$ --- (2) Solving (1) & (2), $a = 0.75 \text{ m s}^{-2}$	D
4	B	E
