

	Unit	Suggested equations
1	D	magnetic flux Φ = magnetic flux density B x area A, magnetic flux density, $B = F / I L$ Unit of magnetic flux Φ = unit of $(F / I L) A$ Wb = $(\text{kg m s}^{-2}) \text{ A}^{-1} \text{ m}^{-1} \text{ m}^2 = \text{kg m}^2 \text{ s}^{-2} \text{ A}^{-1}$
2	D	intensity $I = (\text{Power } P) / (\text{surface area } A)$
