

- 26 The alternating current from an a.c. mains supply varies sinusoidally. The graph below shows how the square of the current I in a given resistor varies with time.

Which direct current in the same resistor would generate the same average power as that from the alternating current?

A 2.0 A

B 2.8 A

C 3.9 A

D 5.5 A

26	A	Peak current roughly equals $\sqrt{7.8}$ Rms current for sinusoidal = $\frac{\sqrt{7.8}}{\sqrt{2}} = 1.97 \text{ A}$
