

- 5 A heavy uniform beam of length L is supported by two vertical cords as shown.

What is the ratio $\frac{T_1}{T_2}$ of the tensions in these cords?

A $\frac{1}{3}$

B $\frac{1}{2}$

C $\frac{2}{1}$

D $\frac{3}{1}$

5	A	Taking pivot about centre of gravity: $T_1 \times \frac{1}{2} l = T_2 \times \frac{1}{6} l$ $T_1 / T_2 = \frac{1}{6} l / \frac{1}{2} l = \frac{1}{3}$
