

Ans: D

- 2 Errors in measurement may be either systematic or random.

Which of the following involves random error?

- A Not allowing for zero error on an analog voltmeter
- B Not subtracting background count rate when determining the count rate from a radioactive source
- C Stopping a stopwatch at the end of a race
- D Using the value of g as 10 N kg^{-1} when calculating weight from mass

Ans: C

- 3 Two projectiles X and Y are launched into the air from the same place on level ground. They
