

28	B	Current = power / voltage = $1 \times 10^6 / 66 \times 10^3 = 15.15 \text{ A}$ Power loss = $I^2 R = (15.2)^2 (5) = 1100 \text{ W}$
29	A	$hf = \phi + E$ gives $hc/\lambda = \phi + E$ so
