

2 D

Magnitude of 2nd displacement = $\sqrt{150^2 + 140^2} = 205 \text{ cm}$

At a direction $\alpha = 90 - 30 - \tan^{-1} (140/150) = 17^\circ$ below x axis or 343° anticlockwise to +x axis

3 B At $t = 0 \text{ s}$
