

Ans: C

Q2

$$B = \frac{AD}{6C^2} \Rightarrow \frac{\Delta B}{B} = \frac{\Delta A}{A} + \frac{\Delta D}{D} + 2\frac{\Delta C}{C}$$

$$\frac{\Delta B}{B} = \frac{0.1}{2.0} + \frac{0.01}{3.45} + 2\frac{0.05}{4.10} = 7.7 \times 10^{-2} = 7.7\%$$

Ans: C
