18	**Ans: B** $V = \frac{Q}{4\pi\varepsilon_0 d}$ $V_{new} = \frac{Q}{4\pi\varepsilon_0 \frac{d}{4}} = 4\left(\frac{Q}{4\pi\varepsilon_0 d}\right) = 4V$ $E = \frac{Q}{4\pi\varepsilon_0 d^2}$ $E_{new} = \frac{Q}{4\pi\varepsilon_0 \left(\frac{d}{4}\right)^2} = 16\left(\frac{Q}{4\pi\varepsilon_0 d^2}\right) = 16E$
