5	**Ans: A** Length of slope, $s = \sqrt{1^2 + 2^2} = \sqrt{5}$ $\frac{1}{2}mv^2 = mgh - Fs$ $\frac{1}{2}(5)v^2 = (5)(9.81)(1) - (4)\left(\sqrt{5}\right)$ $v = 4.00 \text{ m s}^{-1}$
