|---|---|---|
| | | have different kinetic energies. (Correct statement) |
| **12** | **C** | The frequency response curve of a damped oscillation should be entirely below (within) the curve belonging to the lightly damped oscillation. Hence Options A and B are incorrect.<br><br>The frequency response curve of a damped oscillation (Q) should have a lower peak and the peak shifted left compared to the curve of a lightly damped oscillation (P). |
