		D: $p = mv = 1000 \times 12 = 12\,000 = 1.2 \times 10^4$ kg m s^{-1} (incorrect)
2	**D**	When drawing vector triangles, the resultant force of D is zero while the rest of the resultant force A, B and C are non-zero.
3	**A**	As the person walks closer to Q, the distance to the pivot Q decreases which reduces the
