

	$x = 1.8 \times 10^{-3} = 0.18 \text{ mm}$
17	Ans: C $R = \frac{\rho L}{A}$ $R = \frac{\rho L}{\left(\frac{V}{L}\right)} = \frac{\rho L^2}{V} = \frac{\rho (L_0 + x)^2}{V}$ Note: For constant volume, R against x graph is quadratic.
